

TeamItalia[®]

Lighting

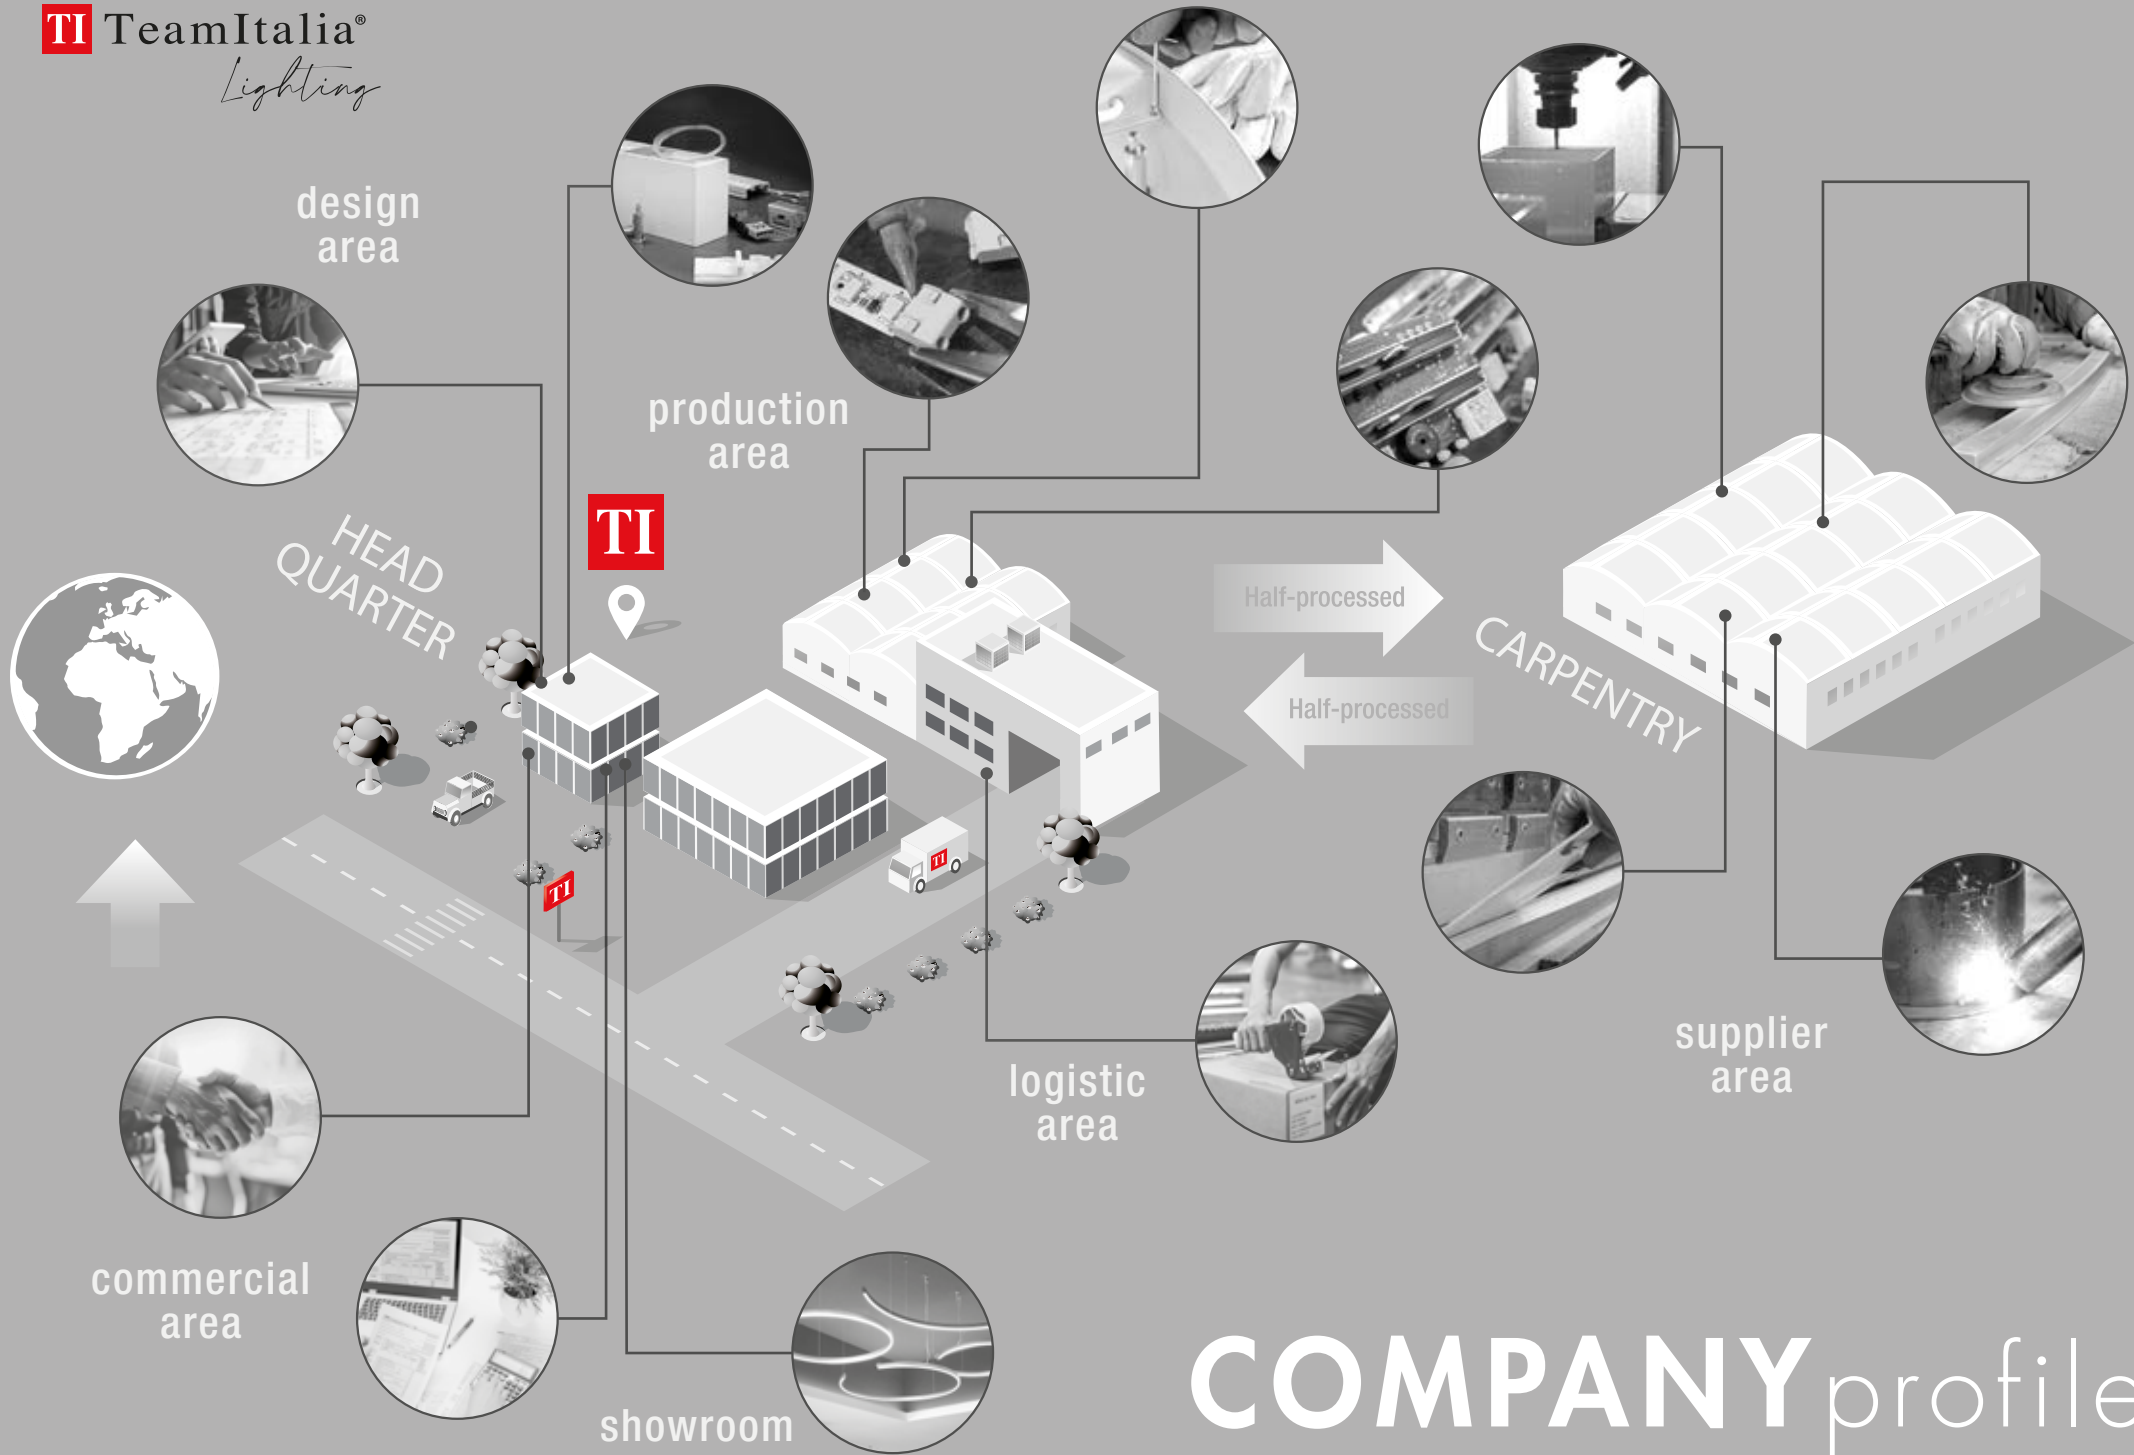

Who we are

Team Italia Lighting is a company that, since 1991, designs and manufactures excellent lighting fixtures capable of ensuring the best livability of environments, maximum energy savings, and innovative design ideal for residential buildings, commercial establishments, and large structures.

**Lighting fixtures
of excellence**

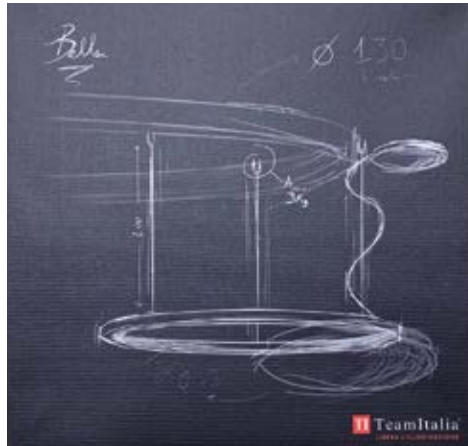

COMPANY profile

Research & Development

Professional Architects Lighting Designers

The research and development sector of Team Italia is coordinated by professional architects and lighting designers.

Experts in the field capable of designing customized solutions and providing specialized lighting assistance.

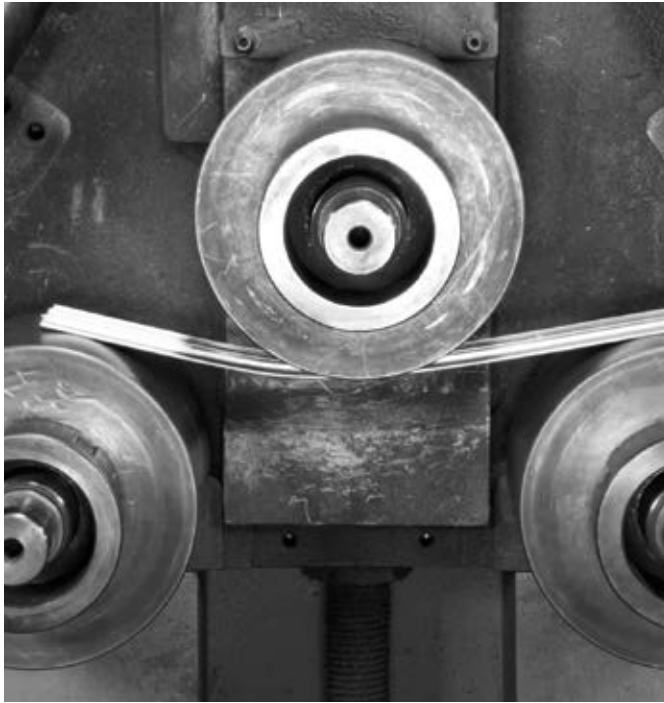

Production

Every artifact is conceived, designed, and manufactured by Team Italia at their headquarters in Caselle di Sommacampagna, in the province of Verona.

It is therefore a product strictly Made in Italy.

The production takes place without any compromise in the choice of materials and electronic components.

Dedicated Areas

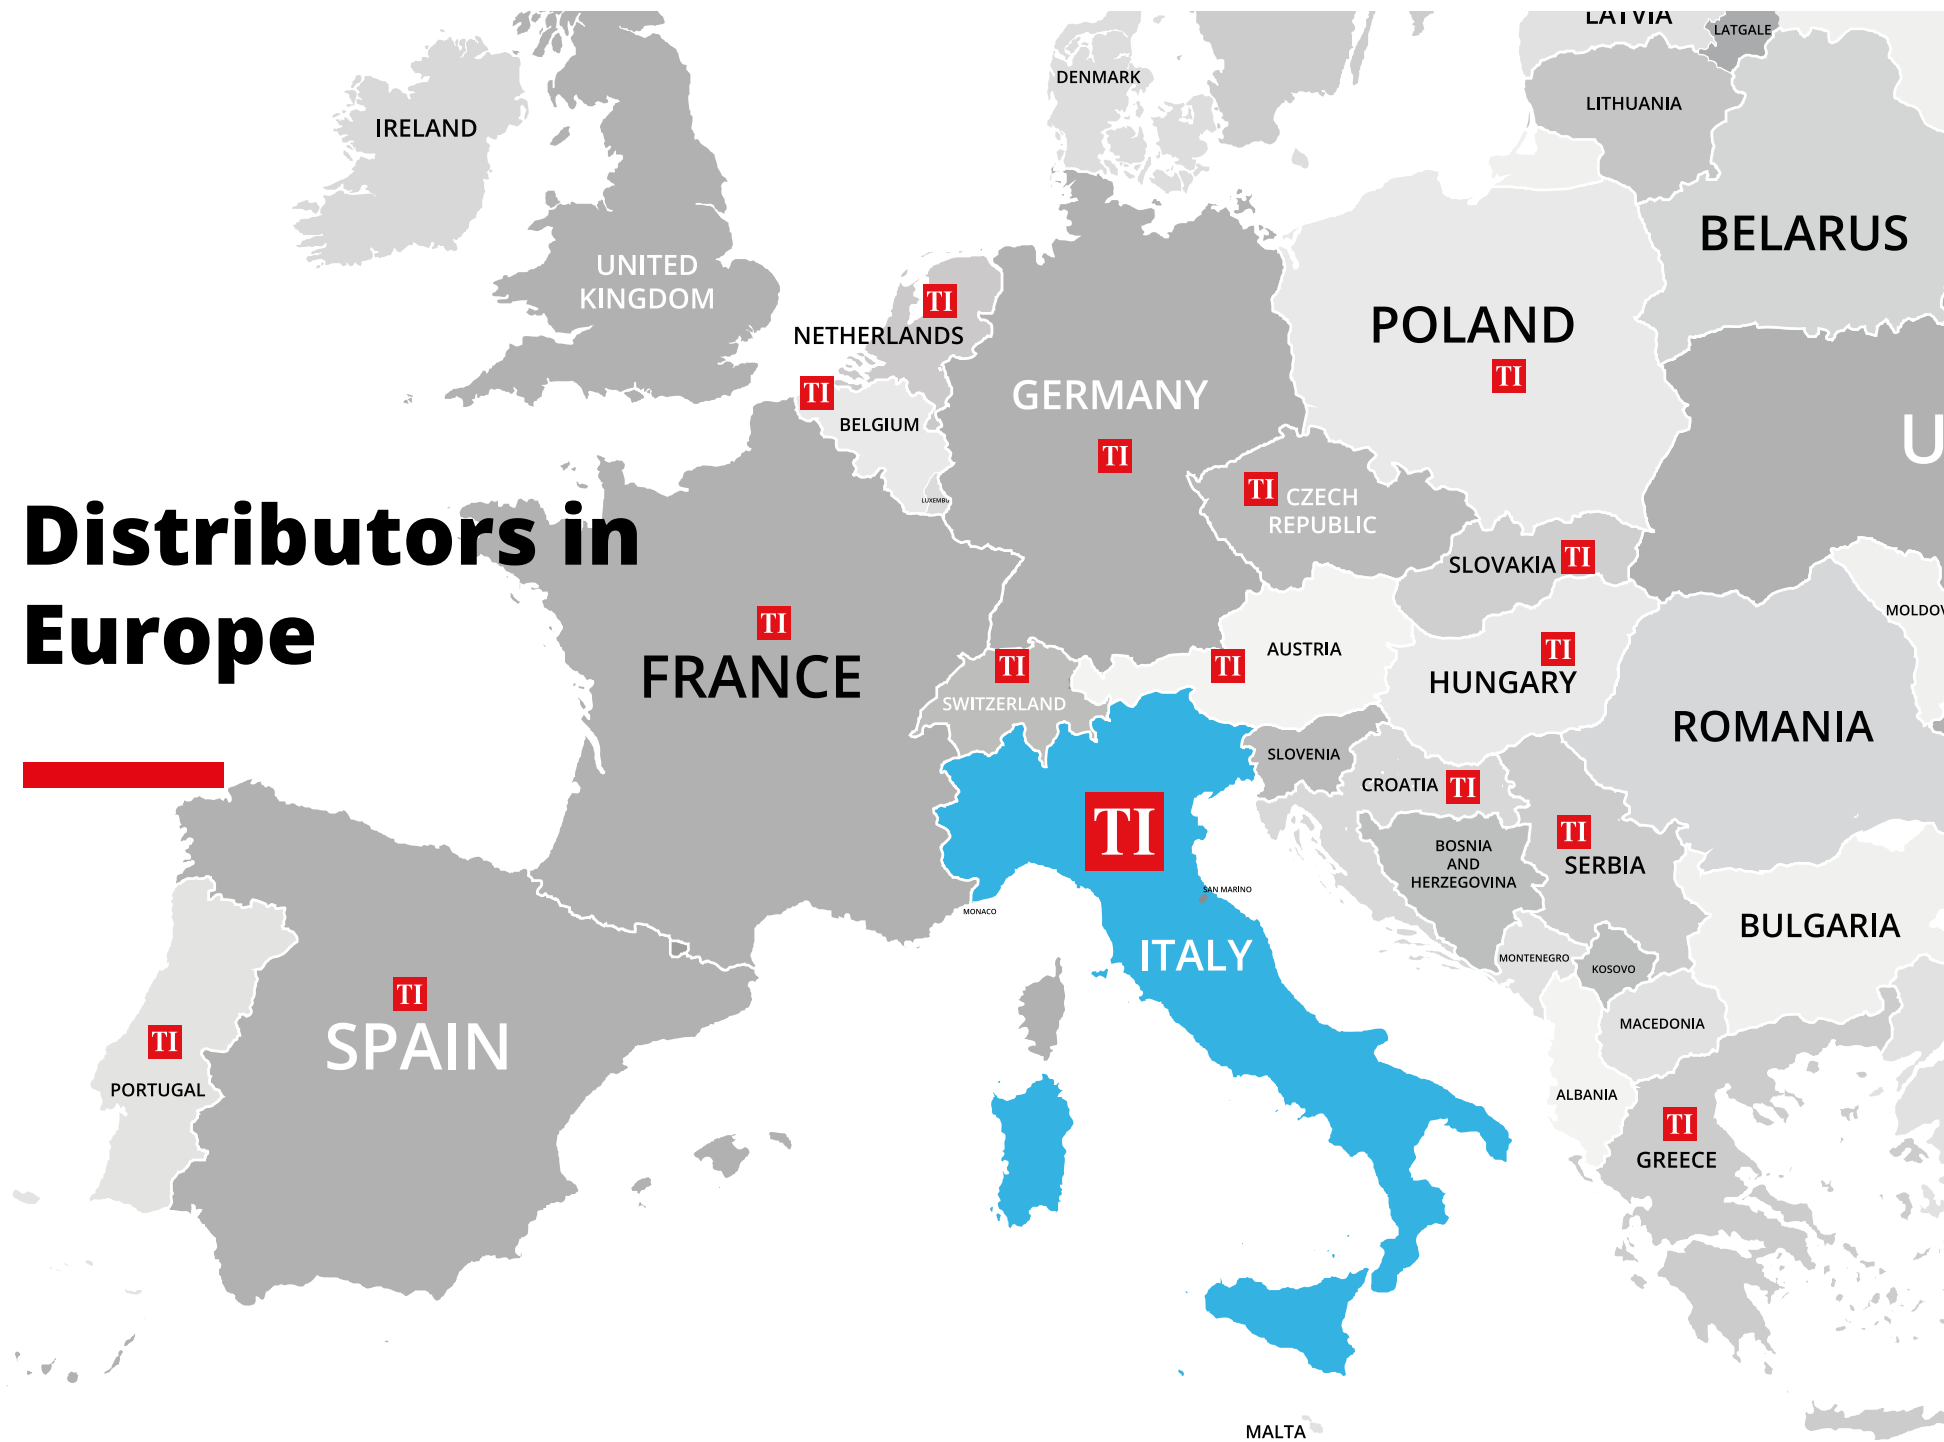

The company is expanding and has recently doubled its production and exhibition space. -

There is an area where customers are involved in the process of designing and creating their own illuminated environment.

Distributors in Europe

TI TeamItalia®
Lighting

Thanks to its extensive network of professional resellers, Team Italia offers widespread distribution of its products throughout the national territory.

Projects

Individuals, professionals, companies,
offices, structures.
For years we have been supporting ex-
perts in the realization of lighting projects
all over the world.
